Overview

High Voltage Direct Current (HVDC) transmission draws an ever increasing interest of TSO in Europe and all over the world. Major developments in technology make HVDC in many cases more reliable, easy to apply and operate, economically affordable. Wider applications are now possible and many projects are under development, making HVDC an even more interesting business than before also for manufacturers and engineering companies.

The conference will serve as an International forum for the presentation and exchange of technological advances and research results in the broad fields of HVDC Power Systems applications.

The following issues are within the scope of the conference:
- HVDC operational experience;
- Outlook of HVDC projects planned and at design or construction stage;
- Latest (ongoing) and next coming developments in HVDC technology (converter stations, cables, overhead lines);
- Market perspective.

The conference will bring together leading utilities, universities, transmission system operators, consultants, equipment suppliers, and solution providers to help shape the future of power transmission industry. A Technical Exhibition with Industry attendance will be held.

Registration fee on published on the conference website.

Website: https://convegni.aeit.it/HVDC2019
Submission of Papers

Who intend to submit a paper must first register the title of the contribution and the name of authors in EDAS (www.edas.info/N25529). The working language of the conference is English. Subsequently, within the scheduled deadline, submit the full paper (six pages) as PDF following the IEEE layout requirements by using the template given at the conference web page: https://convegni.aeit.it/HVDC2019 via EDAS https://edas.info/N25529

The full paper should contain a complete description of the proposed technical contribution along with some results, suitably framed in the related state of the art. Each paper will be reviewed in terms of relevance with respect to the scope of the event, originality and quality of the technical content, overall organization and writing style. All Papers accepted will be included in the Conference Proceedings. Conference content will be submitted for inclusion into IEEE Xplore as well as other Abstracting and Indexing (A&I) databases.

Topics of interest include but are not limited to:

- AC network harmonic impedance and HVDC harmonic performance
- Control of HVDC grid converters and offshore wind farms for the provision of ancillary services and grid code compliance
- Flexible Power Flow Control in HVDC grids
- HVDC Cables for high performance transmission lines
- HVDC Grid operation
- Evaluation of offshore HVDC grid configuration options
- HVDC Grid protection
- HVDC grids and offshore wind farms
- HVDC links
- HVDC return sea electrodes for High Power links
- HVDC technology (converter stations, cables, overhead lines)
- HVDC VSC links with OHL: management of fugitive DC faults
- HVDC-VSC systems
- New HVDC Projects implementation/refurbishment
- HVDC transmission systems
- Interaction of HVDC systems with the AC networks
- Market perspective
- Meshed HVDC Schemes: Control Design and Experimental
- Multilevel High Power Converters for Voltage Source HVDC
- Multi-terminal HVDC operation in a weakly interconnected system
- Operating experience of existing HVDC Systems
- Outlook of HVDC projects planned and at design or construction stage
- Power Electronic Devices and Converters
- Research and Development of Multi-terminal Hybrid UHVSC-HVDC

Executive Committee

Roberto Caldon • AEIT, General Co-Chair, Italy
Stefano Massucco • AEIT, General Co-Chair, Italy

Local Committee

Pietro Antonio Scarpino • AEIT, Italy
Francesco Grasso • AEIT, Treasurer, Italy

Technical Committee

Silverio Bolognani • University of Padova, Italy
Paolo Bordignon • RXPE, Italy
Carlo Cecati • University of L’Aquila, Italy
Diego Cirio • RSE, Italy
Pietro Colella • Politecnico di Torino, Publication Chair, Italy
Alessandro Costabeber • University of Nottingham, UK
Fabio Crescimbini • University of Roma 3, Italy
Antonio Gomez-Exposito • University of Sevilla, Spain
Oriol Gomis Bellmunt • ETSEIB, Spain
Giorgio Graditi • ENEA, Italy
Mats Hyttinen • ABB, Sweden
Reza Iravani • University of Toronto, Canada
Jun Liang • Cardiff University, UK
Stefano Malgarotti • CESI, Italy
Marco Marelli • Prysmian, Italy
Carlo Alberto Nucci • University of Bologna, Italy
Giuseppe Parise • University of Roma, Italy
Paolo Pelacchi • University of Pisa, Italy
Angelo Raciti • University of Catania, Italy
Dirk Van Hertem • KU Leuven, Belgium
Chiara Vergine • Terna, Italy
Costas Vournas • National Technical Univ. of Athens, Greece
